Pentagon EMS Opens Manufacturing Facility in Mexico

Beaverton, OR (June 19, 2007) – Pentagon EMS Corporation has just completed expansion, opening the doors to a brand new manufacturing facility located in Juarez, Chihuahua Mexico.

This new manufacturing plant is equipped with the latest CNC vertical milling centers and will handle tooling production and assembly for Pentagon's entire Mexican client base. Moreover, this additional manufacturing capacity paves the way for expansion of the Mexican client base. Removing that portion of the workload from the Beaverton, OR facility will in turn provide additional manufacturing capacity for Pentagon's USA, Canadian and other international customers.

"The opening of this new location really solidifies our position as the true market leader in the PCB assembly tooling industry. It streamlines the process for our Mexican customers, making it much easier and faster for them to obtain the high quality tooling they need to manufacture cost effectively.", says Pentagon's Marketing Manager, Randy Morrison.

Pentagon EMS is a value-added supplier of tooling and fixtures for the electronic assembly industry. Supported processes include Wave Solder, Surface Mount, Press-Fit, Conformal Coating, Inspection, Test, and more.

See Pentagon EMS at Booth #608 at SMTAI, October 9&10, 2007 at the Gaylord Palms Convention Center and Hotel in Orlando, FL and find out more about Pentagon EMS on their website at www.pentagon-ems.com. Contact the company by phone at (503) 924-2747 or by email at sales@pentagon-ems.com.
